

Over the past four years Monarch has been using the Broker Blast services offered by TorontoWebHost.com to market our co-operating broker programs to GTA Realtors. Since our first campaign together in 2006, we have expanded our relationship and have subsequently executed many successful eblasts and direct mail campaigns through Toronto Web Host. We have found that their eblast services are the fastest and most effective way to reach local real estate agents.

Not only do Toronto Web Host's Broker Blast services allow us unprecedented access to local Realtors but their customer service is second to none. Maureen from the Toronto Web Host office has consistently been able to successfully implement our many eblast campaign requests, often within only a couple of hours. Monarch will continue to use these unique services and highly recommends Toronto Web Host to any company looking for a quick and easy way to reach Toronto area realtors.
